Anton Sprint eVo 2 Kit 2 Gas Analyser

The eVo has landed! Following on from Antons market leading and award winning Sprint V range sees the launch of the new improved Sprint eVo Range of intuitive multi-function analysers.

The new Sprint eVo range from Anton boasts many new features which include enhanced software, simplified auto zero purge structure enabling quick use of non-pumped tests, improved high contrast backlit graphic screen; to mention just a few!

The overall design is more intuitive, modern, ergonomic and robust coming in at approximately 15% smaller than its predecessor, the Sprint V.

The multifunction eVo's menu driven software provides flue gas analysis, pressure, differential temperature, CO build up and gas leak detection tests. A total of 10 separate reports can be generated from these different tests and stored on the analyser. These reports can either be printed on site using an infrared printer, or downloaded to a PC to use with software (included with all V2 and V3 models).

The new range boasts many improvements including enhanced software, improved graphic screen technology and the introduction of the new FreeVo flue probe with unique moisture extraction system.

The Sprint eVo range (excluding eVo 1) is supplied with free of charge software. This enables the engineer to not just print reports on site using our infra-red printer, but to also save their readings to a PDF file on their PC using a USB lead. This can then be used to either printout an A4 report or send via email. You can also use the PDF to set up a recall/annual service alert.

Features:

- Improved smaller ergonomic design with over moulded protection
- Enhanced simple to use, intuitive menu driven software
- CO, CO2, CO/CO2 ratio, O2, XS air, temperature, efficiency with printout
- FreeVo flue probe with unique moisture extraction system (Patent pending 1207896.0)
- Timed let by/tightness test (IGE/Up/1b) with printout (0.01 resolution up to 199.99 mBar)
- Draught/differential pressure measurement with timer
- Operating/working pressure report with printout
- Timed CO build up tests (BS 7967) with appliance selection
- Flow & return temperature with printout
- Li-ion rechargeable battery (no memory loss)
- Instant print facility, without saving to memory
- Internal memory stores over 200 readings
- All previous logs can be recalled & viewed on screen
- Personalised printouts with traceability & Engineer / Customer signature column
- Improved high contrast graphic screen, multi viewing angle and temperature compensated
- Simplified purge structure, enabling quick use of non pumped tests, saving time & battery life
- Software to enable USB/PC communication with personalised PDF reports
- Five year limited warranty (When annually serviced by an authorised service centre, O2 & CO sensors excluded) BS7967 & EN50379: 2012 Parts 1&3
